Node design control (analytic)
f(z), symlog
z
True Runge function
Equal nodes, degree 16
Chebyshev nodes, degree 16
Fixed hub / q / other supply
Marginal profit (USD, symlog)
Observation time
Paired MC reference
monomial
cheb_same_degree
chebyshev
spline
MC-reference boundary / max error
Error (USD)
Endpoint RMSE
Max absolute error
Mono12
Cheb12
Cheb5
Spline3
Basis conditioning
Design condition number
